Those who believe in the truth and once again in this fall the stones of their days to the verse

"Al-Bazkar Ahl al-Thammin al-Qulub” calms down and puts their hope and salvation in this

They see the great verse and find themselves "being" from the darkness of ignorance and ignorance to the white world. They convey and find the meaning of truth in themselves. A group is also immersed in this vortex of time and because the truth is clearly in their existence. They do not feel overwhelmed by "depravity" and "old age" and as they read the verse of despair.

The singers then come to their senses and are drowned in the darkness. The discussion in this article is critical to the same frustration and absurdity from a philosophical point of view paid.
Disappointment and absurdity arise from a thought that destroys any value. Win and the absurdist: He sees every goal and achievement of every goal as meaningless and the consequences and Harmful effects of this thinking have a social, personal, moral or political burden.

In this article, we intend to examine the critique of individual and social absurdism. And in contrast to a practical solution to get rid of emptiness and despair, which is necessary and inevitable

School of Nihilism

The word nihil has an Latin origin meaning "nothing" in French dictionaries (larovsse grande (synonym of this word in Persian) (reia) and its English synonym (nothings) is therefore nihilism which in Persian's terms can be called "nihilism".

"Nihilism" is called "nihilism and apathy" is the way in which subjects are analyzed. It somehow negates human thoughts. This negation, both philosophically; That is why and how it is "recognized" as well as socially and including contracts.

It is a cumbersome imposition, which nihilism basically rejects. Nihilism The word nihilism means that "supreme values" derive their value from They shake hands or why there is no answer 2) In nihilism there is basically no value left or Because there is no reason or direction because there is no motivation left for a person to adhere to those values Take heart and execute them.Nihilism in the moral and epistemological realms, in fact, whenever the criteria of human judgment in the realm of There is and must be self-destruction, a person suffers from nihilism; That is, man by his own standards Loses and can not prefer one moral and epistemological option to another Give. In this case, man, in every action he takes, faces the ultimate aimlessness of mankind

He sees himself and finds all his deeds in vain and in essence and absurd. From this perspective, life is a kind of human being with pain and suffering and death and change, in any sense And a goal remains empty; That is, when a person asks himself whether to live and live whether he prefers not to or not, he can not provide any answer for it. Answer these questions

It becomes impossible because there is no good reason to choose and prefer one over the other does not have.) 3)

Desperate Philosopher (Spinoza, Nietzsche)

Spinoza's philosophy Spinoza, who was expelled from the Jews, and from the group of Christians who deny him atheism. They thought. He was scared and spent the rest of his life empty-handed. He's for a living he was engaged in cutting and installing spectacle lenses) and it is even thought that he died as a result it was an infection that arose from the glass dust in his lungs (and philosophy at timesin his spare time he wrote to the saints in his personal life more than any other great philosopher it was as if on the day of his death he was calm and fearless, and life despite the vicious attack
The malice that befell him never got angry and he lost his sensible temper. Nadad Spinoza writes: I found from experience that all the normal things that people pursue in life. It is vain, and none of the things that frighten me are good or bad in themselves. It's not and only the mind is influenced by them, I finally decided to investigate whether. It is something that is really good and can convey goodness and thought only under its influence.

And get rid of everything: Could it really be something that I discovered and achieved? To be able to enjoy lasting and lasting happiness. That's the decisión I was thinking unreasonably and cautiously about what is reliable for it. What is not sure to lose. And I was also aware that if you dedicate yourself apart. If I look for something other than that, I will have to forgo those benefits. It was clear that if true happiness happened to be in fame and fortune, I would inevitably lose it. Gave while if the opposite is not happiness in fame and fortune and I pay attention to it. If I spend, I will fail on the same basis.

1) Life from Nietzsche’s point of view

This is how Nietzsche portrays life, the emergence of learning and the belief that everything is It is empty, everything is the same, everything is over. Echoes came from all the hills. Everything is empty and everything is the same. Everything is over. It is true that

We have reaped, but why is our fruit ruined and black? What is the shower of the evil moon? All our work has been in vain, and our wine has been poisoned, and the evil eye has soon fallen on our crops and our hot hearts is we are all dry and if fire falls on us we will be reduced to ashes. Yes, we will burn fire too. We are tired. FountainEveryone is safe.

2) Nietzsche considers irreconcilable nihilism to be a belief in which existence is absolutely indefensible Is; When we compare it to the highest values we know, moreover, The recognition is that we have no right at all to objects of a “transcendental” or a “in essence”

Let us “believe” that “God” or morality is embodied.

Victor Frankel treatment. One of the methods that Dr. Victor Frankel used in his treatment was that

Introduce people to their responsibilities.

1) Frankel believes that seeking meaning and escaping emptiness lies in the nature of human beings. No one makes sense. The doctor and the educator only acquaint the individual with meaning inherently “The current philosophy of mental health is based on this,” says one slow semantic therapist. It has been established that people should be happy and unhappy is one of the signs of incompatibility with the environment.

Maybe this way of thinking is the reason why the inevitable burden is getting heavier day by day. People are sad, why are they sad? In another article, he hopes that this change the current misconception in America to treat incurable patients rather than their own pain. Let them be proud of themselves and their suffering be proud of themselves.

2) Frankel refers to the disease of absurdity as the disease of the present principle Disease and distress of human societies. He lost this weakness from the weakness in faith. Desire counts human meaning.)
Brotherhood (thoughts, poems)

Brotherhood and his poetic tendencies

Because in the most critical period of political movements, to man and destiny and freedom Our traditional society, which is full of contradictions, turns like our own society Exposed to many fluctuations in the poem of hope, with various signs of its culture Let's face it. To understand the mentality of the Brotherhood, especially its tendency towards man, it must be in different periods

Examined and recognized its components, periodized his thinking tendencies, concepts and He categorized his mental components so that in general he could understand how the continuous formation of tendencies

His works were found in the heart of socio-political events, which can be divided into two periods:

1- Trend of the pre-failure period
2 - The trend of the post-failure period

In the case of the first tendency concerning human destiny, it can be interpreted as a social sense of justice

It is romantic. The period of struggle, the beginning period for the poem of hope, man and struggle for Justice, however, does not yet have the independence and diversity of a special subject such as the next period, diagram Passionate feeling is the clearest sign of his perception of social feeling in relation to revolutionary Romanism And following the thought of Shandro Petofi, the national hero and virtual romantic in the poem "Dogs and Wolves"

Come open the door, open it, I miss you The privacy, the host, the guest of the year and the moon behind the door tremblestNot hail, not death, someone knows my secret so turn to me (m, hope, winter) in the poems of the Third Brotherhood, one can see individual and social despair and even defeat in the face of nature observed for example;

We sat down and kept the moonlight on at night And the night was Shatt Alili "Brotherhood, from this Avesta" (p. 13)

"Dandelion ! Han, what's up where and from who did you get news, Good news, but, but Round the roof and you become fruitless in me. There is no news waiting for me, no pilgrimage, no matter what come on, where did you go?

Really, is there any news yet? Hot ash residue somewhere? I do not close the flame of greed in the stove, is it still evil? "Akhavan, p. 148, end of Shahnameh Breaking the string of fruitless hope is better than attaching in vain, I also agree that he was connected to the absolute impasse, Unless, perhaps, once again, diligence and diligence, perseverance open the way from another path "(Akhavan, p. 121, says life)

The Brotherhood’s frustration is the result of a black and dark frustration that is also rooted in thought. It has the Brotherhood, and this indicates frustration and submission to the judiciary, which is straightforward And that’s how it turned out.a Al Pat Pet Ranjou Candle near Death

Omid, Winter (The Brotherhood, with its winter collection, clearly conveys its frustration to the listeners. To Assyrian saying: In this book, the Brotherhood has a painful moan. The content of the winter poetry collection is a reflection of his hatred of breaches of contract and two The colors of the helpers feel cheated and have no blame or march anymore

The green forest, not the red grove, his particular style actually begins in the second half of the series Be. I'm a guest every Saturday, Lolly I, too, am a stumbling block Sanam, Insult of Creation Post, Awkward Song. Not from my soul, not from my bell, the same colorless color (M, winter hope). The extreme despair and heavy sorrow of homelessness here is recounted in the language of the Brotherhood, his whispers with A short and melodic sentence that expresses sadness from the seemingly true deceptions and tricks, And the expression of colorlessness is expressed as the mother of a dead child who tracks her grief under her lips

He whispers and calms himself by moving. The Brotherhood finally complains about its creation and questions the universe. I am an awkward creation. Not hail, not death You hear a voice talking cold and teeth. I came tonight to lend I will put the account next to the cup (M, Omidzamestan). Brotherhood in thisJa states that not even death occurs, the echo of his voice rises.

He found that his despair and hopelessness caused a change in man's view of himself, those around him and society Is. It is possible that he sees society from another angle due to his short-sightedness, perhaps this short-sightedness

It dominates all life and because it changes its beliefs from another perspective See and if these situations and behaviors that are contrary to the principle of Islam and hadiths and the Holy Quran Is, to be immersed in body and soul. And it is inevitable that man will retreat to absurdism And deprive him of the qualities that a worthy semantic man deserves, and at some point Walk in vain and emptiness and meaninglessness. Quran and Hadith treatment strategy

One of the ways to escape from despair and hopelessness is to realize God's mercy and hope in God's grace, is. In four cases, God has been asked for mercy, three of which are from the prophets and the other

Conclusion

As it is obvious, various works of the Third Brotherhood (M. Omid) were presented in the face of which We can point to two approaches: the first approach is the poetic poetic appearances that catch the eye of every viewer It focuses on itself and empathy and language is established between the poet and the reader. The second approach : The poetic depth of the Third Brotherhood carried other meanings.

And it fits into the personal situation and the exhausting life and other intellectual factors of the poet Took.

The result is that, considering the works of the Third Brotherhood and the biography quoted in his poems. The Brotherhood cannot be considered nihilistic and nihilistic, but according to the time period. The poet's empty and desperate thoughts in the poet's poems can not be considered unexpected. Here, we have tried to use verses and hadiths and from a purely critical point of view, the poems of this Evaluate the great poet with evidence of Western culture and the basis of this thinking.
